

A Message from Citizens for Citizens:

The Department of Public Utilities has "extended" the moratorium on residential utility shut-offs until July 1, 2021. It was set to expire on April 1st, 2021. What this means, is that no one will lose their gas or electric service until that point. Customers will be receiving notices telling them that they need to apply for assistance or get on some type of payment plan to avoid termination after July 1st.

Our fuel assistance program has extended the timeframe to apply from April 30th to May 28th! Any "new" client can now apply online by visiting our CFC website at [www.cfcinc.org](http://www.cfcinc.org) and click on the fuel assistance tab & scroll to the bottom of the page. The application can also be translated into a variety of languages so the applicant can apply in the language in which they are most comfortable.
